

Company	A. Sampaio & Filhos - Têxteis S.A. www.asampaio.pt
Contact	Miguel Mendes miguel.mendes@asampaio.pt
Fabric reference	66716
Weight (g/m²)	
Composition	80% WO merino/ 20% PA biodegradável
Brief description	Garment created with Knitted fabric that combines the excellent natural properties of merino wool with the added elasticity and mechanical strength provided by the polyamide fibre. In this case, this combination is achieved by an intimate blend of fibres, which gives the mesh a refined final look, as well as an excellent touch. The great innovation of this fabric is that the synthetic component was designed to be biodegradable in an industrial landfill environment (anaerobic decomposition).
Sustainability evidences	Company certified STeP by OEKO-TEX® - sustainable textile production (certificate nº 16000164)
Application field	Fashion + Athleisure
Designer	Ana Salazar - @anasalazarmyway
